

Central Coast Open Source Solutions Exchange

**Attention Developers! ...Makers! ...Hackers! ...Engineers!
...Open Source Software Enthusiasts! ...Students! ...Geeks!
...Curious Bystanders!**

Are you interested in Open Source Hardware and Software? Excited about the new “maker” movement but aren't sure where to begin or what gear you need to get started? Want to get together with a group of like-minded individuals and work on cool projects? We are a group of Open Source enthusiasts in the Santa Barbara and San Luis Obispo County areas, and welcome anyone with an interest in how technology works and what you can do with it for fun and profit. The focus is on learning about and sharing experiences with open source software, hardware, and related materials, including mobile/embedded platforms, as well as how to employ them for positive effect. Both hands-on projects and guest speakers are on the agenda. There will also be lots of hacking (in the classical MIT sense) and for those old enough, some #opticalexperiments ;-)
